## Specifiers Guide 2022

## About Promat UK

Promat UK is an acknowledged leader in the manufacture and supply of fire, thermal and acoustic solutions. We are proud to provide a range of products that are trusted, proven and installed worldwide, across a diverse range of industries and applications. Promat UK is a division of Etex Industry who are a key part of the global Etex Group, a global company operating in 42 countries, with over 110 sites and more than 11,000 skilled and dedicated professionals.

## Promat SYSTEMGLAS®

Promat SYSTEMGLAS® was the first butt jointed glazed fire protection system to be developed for the UK market and has continuously been improved over its more than 30 year history of providing passive fire protection. This system can either be framed or butt jointed so architects can achieve unlimited runs of aesthetically appealing glazing without any compromise to fire resistance. All components are tested together as a certified system and there are a variety of framing options to suit the interior of any building. SYSTEMGLAS® meets or beats the most stringent UK and European passive fire protection regulations. The use of fully trained Promat-approved installers ensures complete peace of mind that is has been installed in line with Promat guidelines along with maximum reassurance of supply chain traceability.

## SYSTEMGLAS® Options

Promat SYSTEMGLAS® Celare

Promat SYSTEMGLAS® Advenerat

Promat SYSTEMGLAS® Ligna

Promat SYSTEMGLAS® Ferro

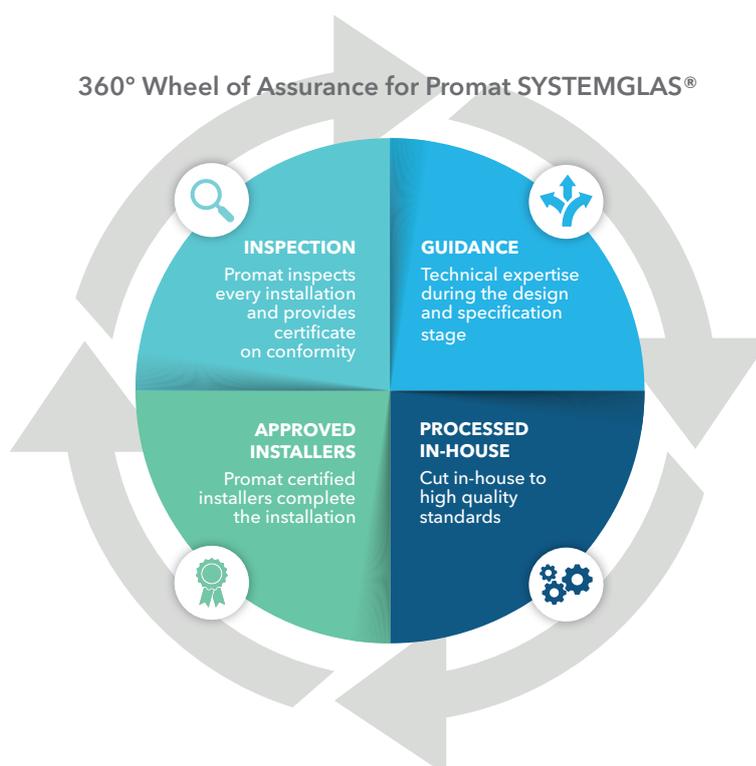

# WHY SYSTEMGLAS® IS 'SPECIFIED FOR A REASON'®

- The glass, framing and components are fire tested together as a complete certified system
- Promat has solutions for the entire market, ranging from fire-rated solutions with 30 minutes integrity and insulation (EI30) up to 120 minutes (EI120)
- Produced in-house by Promat for maximum supply chain traceability
- As part of the 360° wheel of assurance, the system is fitted by Promat-approved installers and a Certificate of Conformity is issued by Promat UK
- Butt jointed glazing for maximum light transmission and a contemporary appearance
- Project support by Promat UK from specification through to installation
- A history of over 30 years producing fire rated glazing systems across the world

## 360 Degree Wheel of Assurance

To prevent product substitution and poor installation, Promat UK introduced the 360° Wheel of Assurance for SYSTEMGLAS®. Promat's technical experts provide guidance on the right approach at the design and specification stage. The system is manufactured in-house to ensure all cutting and processing is completed to the highest standard. Promat inspects the system on completion to ensure it has been installed in accordance with Promat recommendations and a certificate of conformity is provided ensuring the integrity of the system from start to finish.

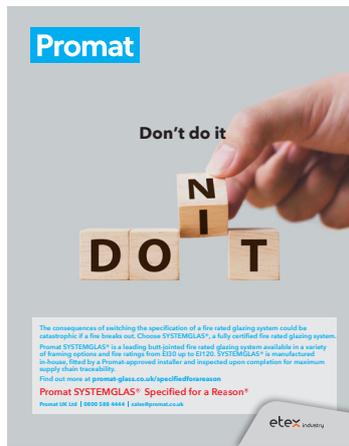

Promat can provide this assurance because it is in complete control of the design and manufacture process, and has in-depth knowledge of the installation requirements. This means supply chain risks, such as product substitution or poor installation, can be eliminated.

# SYSTEMGLAS® SPECIFIED FOR A REASON®

In 2020 Promat initiated the thought provoking 'Specified for a reason®' campaign to challenge product substitution in the industry and emphasise the importance of using a fully certified system.

The advertisements featured in a number of architectural journals and won an award for the most memorable and effective advertising campaign.

## SYSTEMGLAS® Product Stamps

If there is not a Promat SYSTEMGLAS® stamp on the glazing then it is not SYSTEMGLAS®

# SYSTEMGLAS® OUR VISION

"Protecting lives and property by reducing fire risk through education and increasing knowledge in the construction industry. Our expert advice, tested products and guidance result in safer solutions for the built environment. "

## Promat UK Capabilities

- UKAS Accredited In House Test Facility
- Barrier Load Calculations
- Acoustic Simulations
- Expert Technical Assistance
- Project Specific Assessments
- Installer Training Courses

## SYSTEMGLAS® Information

### CPD Presentations

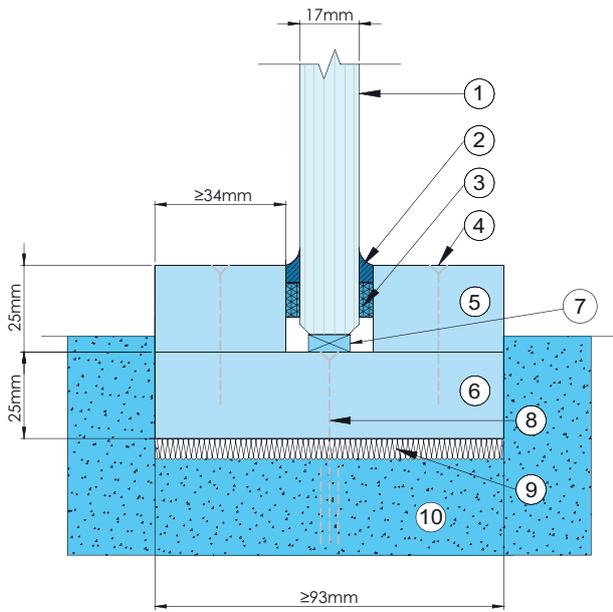

Promat offer a variety of educational resources, including 'The Burning Question' RIBA approved fire rated glass CPD and the comprehensive SYSTEMGLAS® CPD, which can be delivered at your office or online. Promat are also able to provide Certifire test evidence for the SYSTEMGLAS® range.

Find out more at <https://www.promat.com/en-gb/industry/markets/fire-rated-glass/>

# SYSTEMGLAS® CELARE EI30

SYSTEMGLAS® Celare is a unique fire rated glazing system providing the ultimate solution in maximising light transmission without compromising fire safety. The Promat fire resistant PROMATECT® H Calcium Silicate perimeter framing system is completely hidden in the structures of the wall, floor and ceiling to deliver a 'virtually frameless' and aesthetically pleasing solution in combination with the butt jointed glazing. Whilst the system can be completely hidden in the floor, Promat recommends leaving a small threshold to avoid damage from cleaning appliances.

# SYSTEMGLAS® FERRO EI30

SYSTEMGLAS® Ferro is the original butt jointed fire rated system from Promat and is the most popular product in the range. Launched over 20 years ago, this steel system has been used on countless prestigious projects throughout Western Europe. The steel frame in conjunction with the butt jointed glazing offers a contemporary feel and maximises light transmission throughout the building. The slimline 50mm steel perimeter framing is tested to large sizes and an unlimited number of vertical panels can be clear butt jointed for a continuous glazed screen.

# SYSTEMGLAS® LIGNA EI60 F1

SYSTEMGLAS® F1 is a composite of toughened safety glass with an intermediate layer of fire protection. In the case of fire this performs highly effective insulation which prevents the ignition of flammable materials on the un-exposed side. The glass is UV resistant and available in much larger dimensions than conventional multi-layer fire resistant glass meaning that new designs are possible..

Certifire CF5481

- 1 SYSTEMGLAS® F1 8/22/8
- 2 SYSTEMGLAS® Silicone sealant
- 3 Self-adhesive neoprene glazing tape, 10x3mm
- 4 Hardwood timber frame (minimum 640kg/m<sup>3</sup>)
- 5 Hardwood beads (minimum 640kg/m<sup>3</sup>)
- 6 Steel screws, 5x40mm at 400mm centre
- 7 PROMATECT® H or hardwood setting blocks, 6mm thick
- 8 Masonry fitting, steel anchor or similar
- 9 Compressed rock fibre 45kg/m<sup>3</sup>  
10mm thick x 95mm wide
- 10 Promat PL Strip
- 11 Solid wall, floor or soffit with fire resistance equal to, or greater than that of the glazing system

## EI60 Glazing Specification

- Sizes outlined below.
- UV Stable
- 45 dBRw sound reduction
- 1B1 safety rating
- 66kg/m<sup>2</sup>
- 81% light transmission

## Additional Glass Options

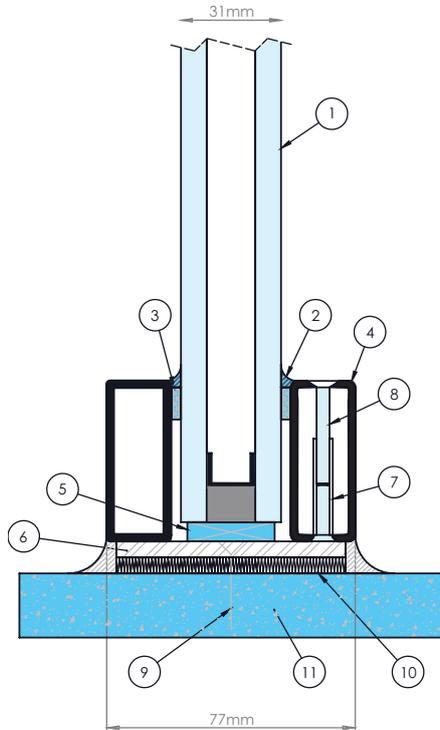

- Low Iron & patterned glass available
- Screen Manifestation

## SYSTEMGLAS® Ligna EI60 Modular Dimensions

		Height (mm)	Width (mm)

# SYSTEMGLAS® F1 JOINT OPTIONS

## In Line Option

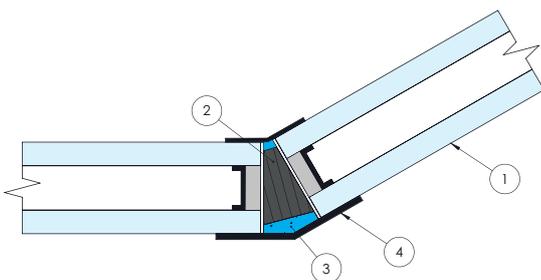

- 1 SYSTEMGLAS®
- 2 Silicone sealant

## 90°

- 1 SYSTEMGLAS®
- 2 Sealmaster Glazing Tape
- 3 Silicone Sealant
- 4 Optional covers (Plastic, steel or aluminium)

## Variable (90°-180°)

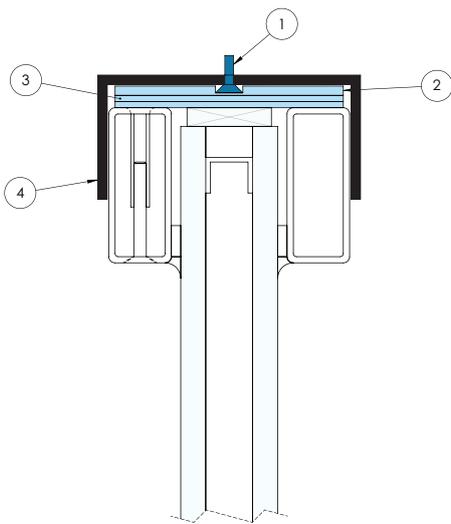

- 1 SYSTEMGLAS®
- 2 Sealmaster Glazing Tape
- 3 Silicone Sealant
- 4 Optional covers (Plastic, steel or aluminium)

Certifire CF5481

# SYSTEMGLAS® DEFLECTION HEAD OPTIONS

If there is likelihood of movement within the substrates to which the frame is secured that could cause additional stress or weight then a movement joint must be constructed. Deflection heads are offered for the SYSTEMGLAS® Ferro EI30 and EI60 systems as a solution.

## SYSTEMGLAS® Ferro F1 EI30-EI120

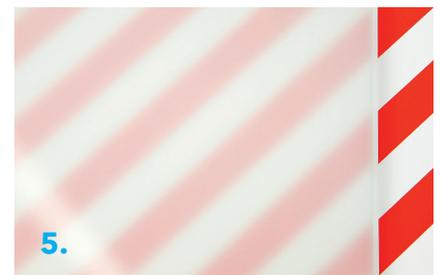

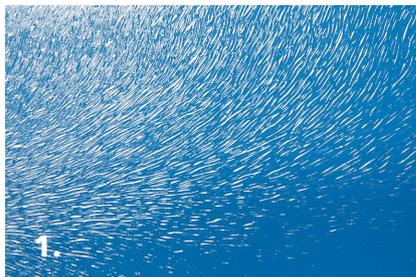

- 1 6mm expansion bolt at 500mm centres
- 2 PROMASEAL® PL intumescent strip (2.7mm thick)
- 3 Mineral wool, min 60kg/m<sup>3</sup>
- 4 3mm steel 'U' profile x 40mm (width dependent on fire rating)

Certifire CF5481

## SYSTEMGLAS® F1 Patterned Options

### Possible glass surfaces

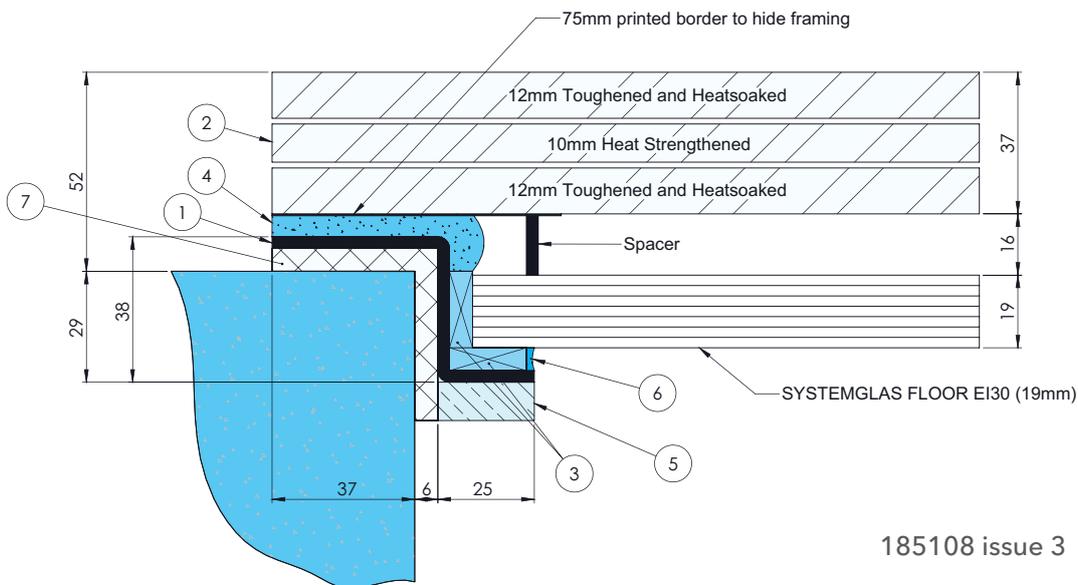

1. Chinchilla clear 6 or 8mm
2. Mastercarre clear 6 or 8mm
3. Silvit clear 6 or 8mm
4. SR 200 white 6 or 8mm
5. Laminated Glass with mat foil 8mm

# SYSTEMGLAS® STRATUM EI30 & EI60

SYSTEMGLAS® Stratum load bearing walk on floor is a completely new construction from Promat designed to give architects even greater creative scope. The floor combines a structural glass floor and either EI30 or EI60 Glass to provide fire protection between floors. Patterned and non-slip options are available and this is proving especially popular with basement conversions.

## EI30 Illustrated

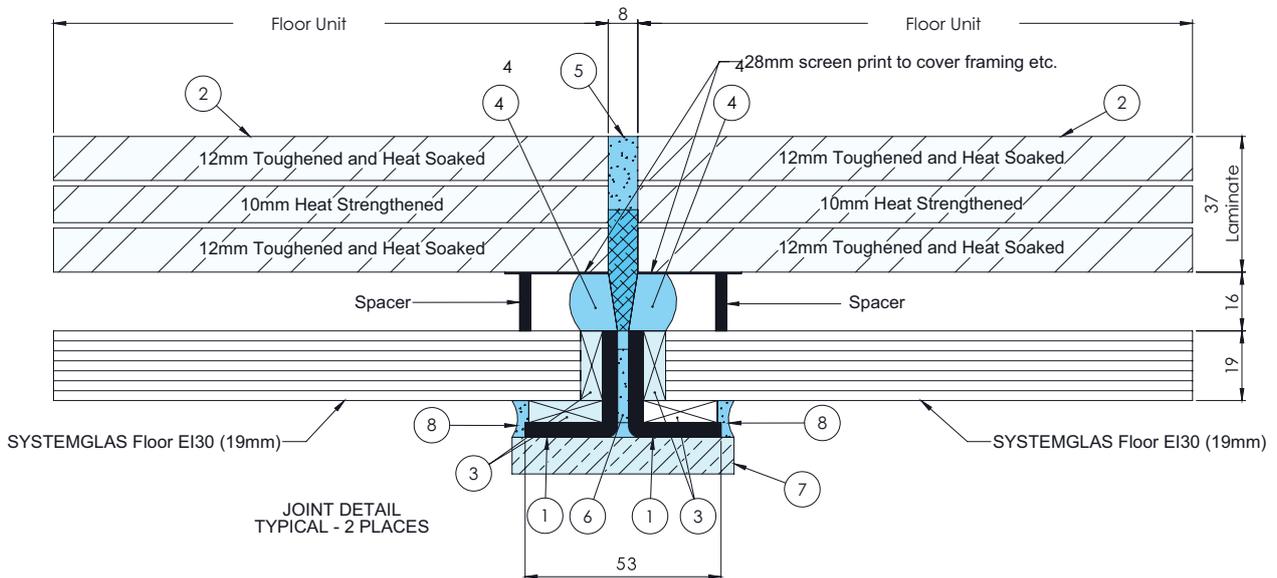

185108 issue 3

- 1 Glazing frame 3mm mild steel 46mm x 35mm x 22mm mitred and welded
- 2 SYSTEMGLAS® EI30 IGU (37mm toughened laminate, 16mm spacer, 19mm SYSTEMGLAS® insulating fire glass) with 75mm screen printed perimeter border
- 3 Glass edge seal, self adhesive 6mm x 20mm ceramic glazing tape
- 4 Structural grade silicone DC3362
- 5 10mm Superwool 607H board x 25mm
- 6 Promat SYSTEMGLAS sealant
- 7 Ceramic Fibre bedding around the base (by others)

# SYSTEMGLAS® PROJECT SNAPSHOTS

## Winchester Avenue, Grimsby.

Promat SYSTEMGLAS® Ligna was recently installed to provide assured passive fire protection for an EI60 glazed atrium at a brand new 60 unit care home in Grimsby. To meet the technical and aesthetic challenges Promat manufactured solid oak timber frames to accommodate widened framing, UV stable glass whilst maintaining the full 3rd party accreditation of the Ligna EI60 system.

## Christchurch, Teddington.

Promat SYSTEMGLAS® Celare and Ligna systems were used in the conversion of a 150 year old church to 6 luxury apartments. SYSTEMGLAS® Celare EI30 with anthracite trims matched the modern internal decor of the apartments whilst Ligna was chosen for the centre piece Gothic stained glass windows.

# SYSTEMGLAS® PROJECT SNAPSHOTS

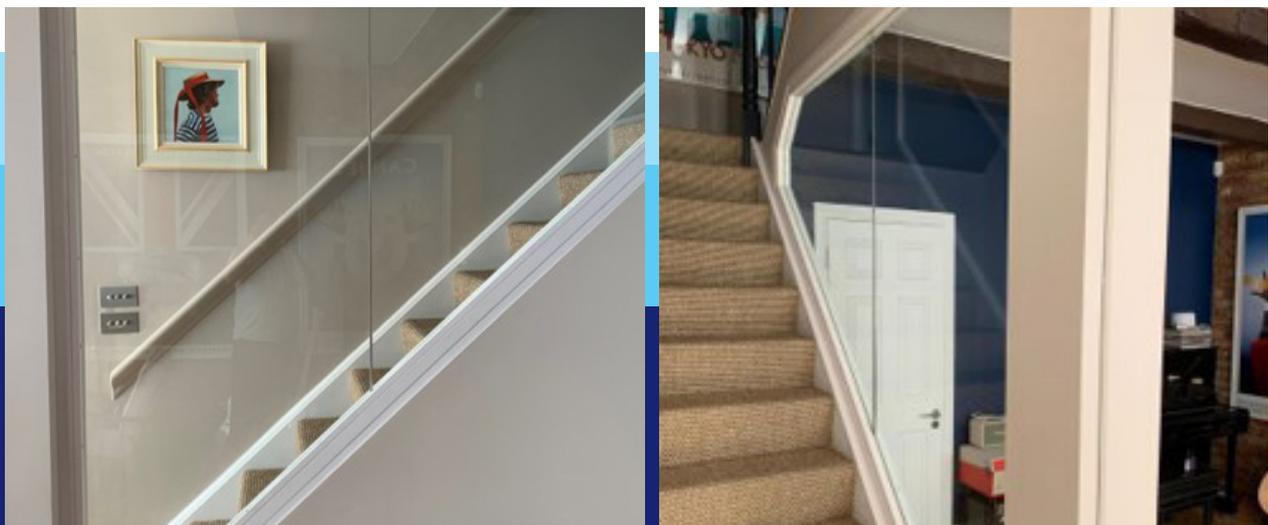

## Engineering Company, Germany.

Promat SYSTEMGLAS® Advenerat provided up to 30 minutes (EI30) fire protection in the boardroom of a leading German engineering company. The PROMATECT® H framing is over clad with a polished aluminium trim and along with the butt jointed glazing creates a futuristic effect and an open environment.

## Mews House, London.

Promat SYSTEMGLAS® Ligna was used to provide staircase compartmentation between the ground and first floor. The clear butt jointed glazing opened up the living space, providing a panoramic view of the living area whilst providing that all important EI30 fire rating.

# SYSTEMGLAS® PROJECT SNAPSHOT

## Royal Wharf, Pontoon Dock.

Promat SYSTEMGLAS® Ligna was installed at a brand new health centre forming part of the Royal Docks regeneration programme. The contemporary timber framing in conjunction with butt joint glazing and matching doorsets was selected to maximise light transmission whilst providing maximum assurance of fire safety from the leading reference in passive fire protection..

## Walled Garden.

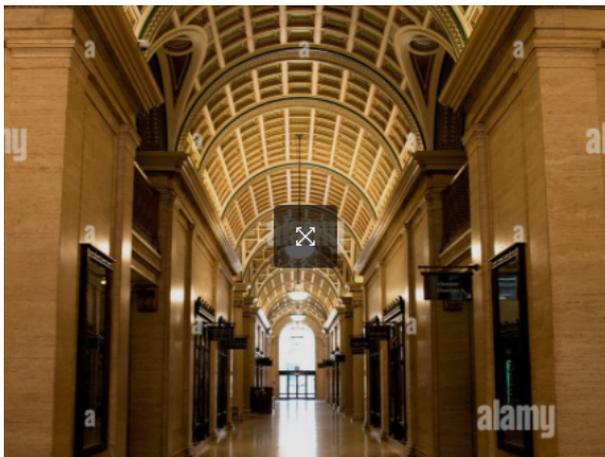

Promat SYSTEMGLAS® Celare was used to provide fire protection on a revolutionary new-build Passivhaus project in Devon. The PROMATECT® H framing is fully concealed in the walls and floor to offer a 'virtually frameless' solution for ultra-modern slim internal windows, which would have been difficult to achieve with a conventional system due to the slim sizes.

# SYSTEMGLAS® ICONIC BUILDINGS

## India Building, Liverpool

Built between 1924 and 1932 for the Blue Funnel Shipping Line this recently refurbished Grade 2 listed building includes 5mtr wide Promat SYSTEMGLAS® Ligna F1 E160 clerestory windows.

## 22 Bishopsgate, City Of London

Standing 278m (912ft) this commercial skyscraper in London occupies a prominent position in the financial district. Promat SYSTEMGLAS® Ferro F1 E1120 screens were installed in the main atria and basement.

## Highclere Castle, Hampshire

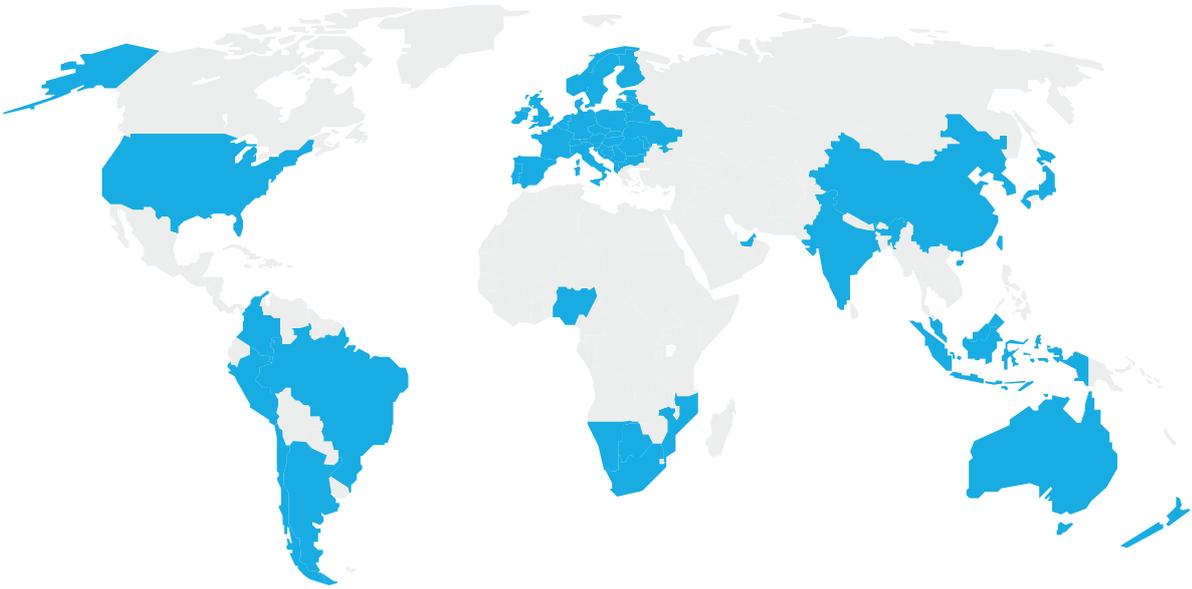

Famous as the location for the hit BBC TV series "Downton Abbey" Highclere Castle is a magnificent Grade 1 listed house that attracts thousands of visitors each year. Promat SYSTEMGLAS® Celare was installed at the visitors centre.

## Buxton Spa Hotel, Derbyshire

Promat PYROSEC® doors were installed as part of a 17year, £70 million renovation. Situated in the ancient town of Buxton famous for its thermal springs this 81 room hotel and spa finally opened its doors again in 2020.

## Benefit from 60 years of experience

Promat is the leading reference and pioneer in the fields of fire, thermal, and acoustic protection. With a strong global presence and 60 years of experience, innovation and know-how, Promat UK is the first choice for fire rated doors and glazing systems.

## Global sales & technical support

Promat has more than 1,300 employees spread over 13 factories, 40 sales offices and 2 innovation centres worldwide. The company is part of Etex Industry, a division of the Belgian industrial group Etex, specialised in the manufacture and supply of construction materials.

## Sales offices and production facilities

Australia, Austria, Belgium, Brazil, Bulgaria, China, Chile, Colombia, Czech Republic, Denmark, France, Germany, Hong Kong, Hungary, India, Ireland, Italy, Japan, Kazakhstan, Lithuania, Malaysia, The Netherlands, Peru, Poland, Romania, Russia, Serbia, Singapore, Slovakia, South Africa, Slovenia, South Korea, Spain, Switzerland, UAE, UK, USA.
